

External API Integration:

1. Shortlisted Candidate List

API will be configured to provide the list of shortlisted candidates between dates.

This API can be called by host periodically.

SQR have following standard Candidate attributes available in addition to Offer attributes and the required attributes can be finalized during workshop so that data traffic can be minimal.

Attribute	Type
created_at	timestamp with time zone
modified_at	timestamp with time zone
first_name	character varying(100)
middle_name	character varying(100)
last_name	character varying(100)
country	character varying(50)
email	character varying(254)
state	character varying(50)
city	character varying(50)
years_of_experience	numeric(10,2)
expected_salary	numeric(15,2)
notice_period	character varying(50)
hiring_manager_id	uuid

recruiter_id	uuid
requisition_id	uuid
status	smallint
current_salary	numeric(15,2)
current_designation	text
current_employer	character varying(200)
education	jsonb
skill	jsonb
cv_url	text
relieve_date	date
relevant_experience	numeric(10,2)
currency_code	integer
comments	text
contact_number	character varying(50)
fixed_salary	numeric(15,2)
variable_salary	numeric(15,2)
qualification_comment	text
preferred_location_detail	text
address1	character varying(300)
address2	character varying(300)
pincode	character varying(100)
